

Warning

Open Water / Thin Ice

There will be a winter aeration system running on Rice Lake in Maple Grove during the winter of 2021-2022. The location of the aerator is in the northwest corner of the lake extending approximately 250 feet offshore from the property address 15573 91st Avenue North.

The DNR has approved and permitted the operation, which will help sustain the fish population in the lake by adding oxygen to the water. Use extreme caution when venturing out on the lake this winter, especially near the aeration area.

Note: At the time of this publication, the lake association is pursuing a possible drawdown. Visit the lake website (www.ricelakemn.com) for more information about this project or e-mail ricelakeassoc@comcast.net with any questions.
